

CastableNFT

Introduction:

CastableNFT is a platform for everyone to mint and sell valuable NFT. Minted NFT can be traded directly on OpenSea. CastableNFT is an open marketplace that everyone can join freely.

CastableNFT Advantage:

- Solve the useless NFT problem, make NFT with basic value. Collateral is required for minting NFT, and can be redeemed via burning NFT.
- Code is open sourced and verifiable. Everyone can mint NFT and manage NFT marketplace freely.
- Supports trading on OpenSea and setting for Twitter icon
- NFT marketplace is a social experiment, more application scenarios can be extended by community based on the basic rules

Safety Verification:

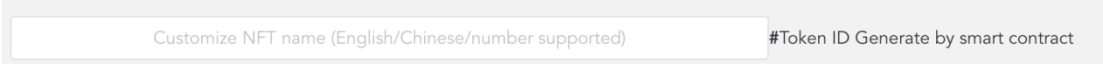

Verified Contract ERC-721:

[0x842864f1Cd1491B77a404b0E30aAc2B67b2c647B](https://etherscan.io/address/0x842864f1Cd1491B77a404b0E30aAc2B67b2c647B)

Open source contract code: <https://github.com/MetaplasiaTeam/castable-nft-demo>

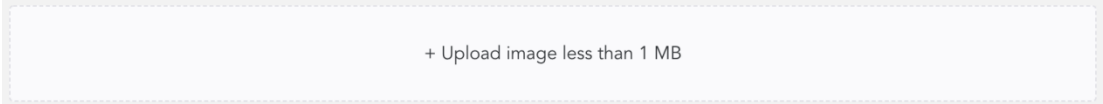

How to use

1. English/Chinese/numbers are supported for setting NFT series name

Customize NFT name (English/Chinese/number supported) #Token ID Generate by smart contract

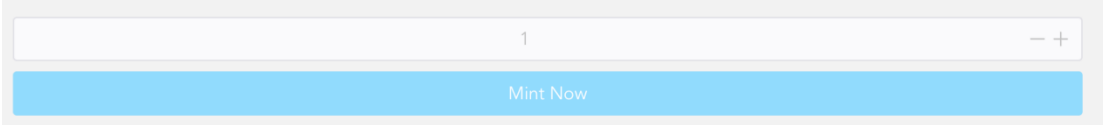

2. Upload NFT image, the image will be saved in IPFS network and no worry about losing image

+ Upload image less than 1 MB

3. To prevent bulk useless image minting, 0.002ETH as collateral is needed for each NFT minting.

4. Enter NFT quantity and click "Mint Now" to process minting

1 Mint Now

5. NFT can be checked in wallet after minted, or checked and traded on OpenSwap(<https://opensea.io/collection/castable-nft>)

Prompt

Minting, check and trade directly on OpenSea

Countiun Mint

Go OpenSea
